Summary of Discussion and Commitments/Agreements

1. Approval of Past UMM Minutes.

Final meeting minutes for the July 13, 1993 2727-S NRDWS UMM were signed as approved by the RL and Ecology unit managers.

2. Status of Action Items
- NONE

3. Status Closure Activities
- Data Evaluation Report

WHC (Mr. S. N. Luke) indicated that a draft report by RCRA Closures evaluating analytes detected during 2727-S sampling is near completion and is expected to enter peer review within two weeks from the date of this meeting. The reworked Sampling Report by Environmental Engineering, which will be a portion of the final report, has been received by RCRA Closures in a usable form although it will require further modifications to incorporate the reanalysis of sample B07555 inorganics. RCRA Closures is awaiting Integrated Risk Information System (IRIS) database information for certain constituents to assist with identifying appropriate cleanup levels.

Ecology (Mr. R. E. Cordts), indicated that an Ecology response to the data evaluation report could reasonably be expected within 30 days of Ecology's accepting the report's findings. Ecology acceptance of the data evaluation report findings would be by letter recommending clean closure of the unit.

- Transmittal of Sample B07555 Inorganics Reanalysis

The laboratory reanalysis of sample B07555 inorganics has recently been returned from the laboratory and will be transmitted to Ecology immediately.

- Closure Plan, Revision 3A, Page Changes

Although not on the agenda, Revision 3A page changes to the 2727-S closure plan will be issued as soon as WHC document configuration concerns are resolved. These page changes are in response to Ecology comments on Revision 3 of the closure plan and also reflect agreements reached with Ecology (Mr. J. J. Witczak) during 2727-S NRDWS Facility sampling and demolition.

Ecology (Mr. R. E. Cordts) emphasized that because the 2727-S closure plan is a portion of the Hanford Facility permit which is scheduled to be issued for public review by 9/15/93, timely receipt by Ecology of the page changes will be important to ensuring their inclusion into the permit conditions.
